Air

# Global Reach

As a leader in Air, Ocean and Ground services, we provide global reach in key markets with our fully-integrated, customized, door-to-door services. From source to final delivery, we deliver reliability, adaptability and real-time visibility.

By selecting the most efficient routing, we ensure that your goods receive optimal attention, space allocation and that time-sensitive cargo arrives on schedule. We are positioned to offer strategic gateway solutions, managing your deliveries around the world with the utmost security while reducing your costs and streamlining your supply chain.

For single-source solutions that perform worldwide, our team of Air, Ocean and Ground professionals service your logistics requirements in an efficient, personalized and cost-effective manner.

## Air Freight

We understand the cost considerations of air freight, so our first class customized programs are designed to optimize your supply chain and provide complete visibility and reliable transit times. CGL's clients enjoy cost-saving opportunities via international consolidations, time-definite, deferred air freight, sea-air, domestic and transborder services, plus fully-integrated, door-to-door service and charter programs.

## Ground Freight

Be it expedited or deferred, Less-than Truck Load or Full Truck Load programs, we provide complete coverage with real-time visibility. CGL's diverse services include express trucking, unloading assistance, GPS tracking, security escorts, transborder, specialized and oversized equipment, including tailgates, vans (dry, refrigerated, heated), flatbed and drop deck trailers.

## Ocean Freight

We offer reliable and multiple weekly consolidation services and world-class NVOCC (non-vessel operating common carrier) capabilities to provide more flexibility and convenience, as well as superior, end-to-end transport for all shipping schedules and requirements. CGL's clients benefit from weekly departures and multiple consolidation points globally, less-than-container load (LCL) and full-container-load services (FCL), multi-country consolidation (MCC) as well as project cargo and specialized services for non-containerized or oversized cargo. We provide Sea-Truck Express services, vessel chartering, Roll-on/Roll-off, Break Bulk, Reefer and Perishables.

# Forward motion

## Partnerships and Alliances

Relationships are key in logistics as strong partnerships and alliances keep the supply chain moving efficiently. At CGL, we continuously build strategic relationships with first-class carriers that enhance your company's efficiency, security and growth. Our global network of professionals provides you with the expertise you require at origin and destination. We work closely with airlines, steamship lines, rail operators and network partners to develop and maintain CGL's high quality standards while providing you with invaluable access to experts in the field and information.

## Foreign to Foreign

As a global logistics leader, we design flexible foreign strategies for your cargo that provides complete control, optimization and visibility throughout the shipment life cycle. This enables our global clients to maintain full custody of their merchandise throughout the voyage, giving them the flexibility to hold shipments and re-route cargo. From conception to end mile, your shipment is overseen by a specialized team using state-of-the-art IT infrastructure.

Our dedicated professionals ensure compliance with the regulations of international and intra-continental trade, thus minimizing risk, all the while, maintaining the utmost in supplier confidentiality.

With CGL's expertise in compliance and our global hubs, we are uniquely positioned to service your international supply chain, clients, licensees and franchisees. We build greater efficiencies and competitiveness for our clients by reducing transportation and inventory carrying costs, as well as improving in-store availability.

## Warehousing and Distribution

CGL's warehousing and distribution services offer a wide variety of customized solutions that address your supply chain and distribution requirements across six continents.

Our global services include:

- Complete warehousing and distribution
- Pick & Pack and order fulfillment
- Bonded storage facilities
- Global hubs
- Foreign free trade zones (FTZ) and bonded logistics parks (BLP) in strategic locations
- Light assembly
- Vendor managed inventory

Cutting-edge warehouse management systems (WMS) provide customers with access to real-time web tracking of inventory. No matter how complex and time-sensitive your warehousing and distribution needs, we have a customized solution ensuring full visibility and control of your merchandise.

## IT Solutions

We are world renowned for providing best-in-class supply chain management technology. Our custom-tailored and fully-integrated systems are designed to anticipate and meet our clients' precise needs. This customer-centric approach optimizes the use of resources and drives the unified application of key initiatives and critical operational procedures by teams of logistics professionals.

Our IT solutions deploy proprietary tools in purchase order management, shipment tracking and supply chain intelligence, guaranteeing consistent access to accurate, real-time information and visibility. Furthermore, our in-house technological expertise provides us with a virtual blueprint of our clients' IT systems, allowing us to fully understand and confidently leverage system-to-system integration. This, in turn, streamlines supply chain operations, optimizes resources, and provides added value at critical junctures. Seamless integration via superior IT solutions propels an information-driven supply chain throughout the shipment life cycle.

CGL IT solutions adapt to specific requirements while ensuring data security through the use of CGL's private cloud and EDI platforms. We provide a multitude of options for EDI, allowing for the exchange of valuable information between customers and vendors.

Our significant and continued investment in cutting-edge technology is at the very core of our ability to consistently deliver innovative IT solutions to our customers. In turn, these solutions offer you reduced cycle time, confident customer service, lower inventories, and a significant reduction in your global logistics costs.

## Consulting

Innovative and professional, our consulting services deliver the best strategic solutions for your international supply chain. CGL's consultants ensure that your business' supply chain and underlying vision are perfectly aligned.

As proven experts in geographic hub evaluation, we design your supply chain from source to end mile, with a clear focus on synchronization. Our experts are positioned to provide guidance for the most demanding challenges, from freight optimization and costing models to security and insurance.

Our integrated comprehensive services include the following:

- Global supply chain design
- Worldwide distribution
- Carrier selection
- Geographic optimal distribution and hub evaluation
- Supply chain technology expertise
- Compliance and trade regulations
- Costing models and rate negotiations
- Security and insurance
- In-house and on-site training and seminars
- Global customs compliance

With our thorough knowledge of international trade agreements and regulations, our Consulting Services reduce your company's risks by maximizing compliance, pre-empting possible delays and increasing speed to market. Driven by passion for performance and innovation, CGL is effectively designing the supply chain of the future.

## Contract Logistics

Our experts become integral members of your supply chain team and create lean, cost-effective tailored solutions.

Operating proprietary facilities for (de)consolidation throughout our global network, CGL facilitates any combination of inbound and outbound cargo transit, ensuring our clients benefit from strategic free trade zones, bonded logistics parks, global hubs and three-channel distribution.

Clients enjoy the advantages of our specialized menu of value-added services, such as Pick & Pack, light manufacturing/assembly, vendor managed inventory, route management, and warehouse management (WMS), ultimately improving profitability and speed to market. All our transportation programs allow for the tracking of your goods with end-to-end visibility.

CGL's clients can leverage our supply chain consulting service to review, analyze, and re-engineer their transport and logistics processes.

## Customs Brokerage

Benefit from CGL's full range of services with our in-house customs brokers.

Our dedicated customs brokerage team is comprised of experts in the field, equipped with the knowledge to ensure your shipments achieve a high compliance rate with government regulations, expediting your cargo through the customs clearance process and avoiding costly delays. From ensuring compliance with NAFTA or FDA requirements to filing a duty drawback claim, CGL will manage your imports and documentation efficiently.

Employing leading edge software, our customs brokerage professionals are equipped with tools and applications to process Importer Security Filings, clear shipments via EDI to CBP and process customs entries. Our team will assist you to develop standard operating procedures and best practices to effectively manage risk and ensure accurate payment of duty rates using advanced tariff engineering.

CGL can assist your business with the following customs brokerage services:

- Clear formal and informal entries and border shipments
- Clear I.T., I.E. and T&E entries
- ISF (10+2) Filing
- Duty draw back
- Calculation of duty, taxes, fees, and other customs charges
- Customs bonds
- Protest preparation and filing
- Follow-up on liquidation issues

# Industry Verticals

Our client base encompasses all major industries including aerospace, healthcare, global retail and manufacturing. But they all have one thing in common: the benefits gained with a more competitive and streamlined supply chain with CGL. Around the world, our teams of logistics specialists are unified by a clear vision, mission and a true understanding of your business needs. Our expertise and core knowledge enables us to constantly develop and fine-tune innovative and cost-effective solutions specific to your industry requirements. At CGL, we leverage that experience to provide tailored global logistics services.

## Aerospace

CGL understands the time-sensitive nature and transportation requirements of Aircraft on Ground (AOG). For critical shipments, our global network and AOG teams operate around the clock to process shipments of any size. We specialize in all areas of asset management, including engine transport, critical logistics and airline catering logistics.

## Healthcare

Our customized solutions address the specific challenges faced by today's healthcare industry, which has evolved into a complex international network of manufacturing, distribution, research and development. Keeping all facets of the industry in mind, we offer ambient and cold chain solutions such as global temperature controlled, monitored, clean facilities and equipment, as well as programs for hospitals and home deliveries.

## Global Retail

CGL is attuned to all segments of the retail and fashion industry including wholesalers, specialty and high end brands. Each has its own inherent logistical challenges. At CGL, our specialists design secure supply chain solutions that improve speed to market and in-store availability, lower global transportation and inventory carrying costs, while supporting international sales and market entry.

## Hi-Tech

With its specific needs and requirements, the hi-tech industry turns to CGL to improve speed to market, while reducing inventory and distribution costs. Our streamlining of the supply chain incorporates end-to-end visibility, as our team of high-tech experts prioritize security and loss prevention.

## Manufacturing & Automotive

To drive your business growth and stay ahead of the competition, CGL's industry experts provide strategies you need to meet production deadlines, delivery schedules and cut costs. Our global hubs with VMI capabilities in proximity to manufacturing centers provide real-time visibility of inventory, affording efficient and proactive management of your production line.
